

Superreel® - Industrial Reel

Pressure washer hose reel

Pressure washer hose reels help you organize all your hoses so you stay organized while moving from job to job for your pressure cleaning business. Keep your business running efficiently so you have more time for more jobs with a heavy duty power washer hose reel.

Pressure washer hose reels not only make hoses last longer, they save time and frustration. Trailer mounted reels pivot and point to where you need the hose. Wall mounted ones save much needed space on the ground. Hand Carry models are light, yet durable to withstand the heavy duty workload. The constant tension design keeps the reel from unspooling additional hose.

Our pressure washer hose reels have quality engineered and constructed fluid paths to handle your pressure washing agents, such as pressure washer soap, cleaning detergent, disinfectant chemicals and other cleaning solutions to sanitize and remove dirt.

Compact design and quality steel construction are incorporated into Superreel ' diverse line of pressure washing reels. No matter what your application, we have a solution for you! We have a versatile and wide reel selection that handles various capacities and comes in different sizes to suit any pressure washing requirement. We also has the engineering power to design and build custom reels, so please consult the factory if you cannot locate a reel that will work with your equipment, we will be happy to assist you with a solution.

Superreel® - Industrial Reel

OUR CAPABILITIES

- Ultra-high pressure and high current, the highest pressure of gas and liquid up to 80-100MPA. Taking advantage of the National New Energy Policy, the maximum current of the DC charging reel can reach to 500A.
- Super-long. Spring-driven reels can handle hoses or cables up to 50 meters. Motor-driven reels' capacity up to 3000 meters.
- Engineering reciprocation. One of the few domestic manufacturers that can produce reciprocating hose reels and multi-line hydraulic reels.
- Smart reels with intelligent functions. Limit, feedback, measurement, remote control, APP control, adaptive control and other functions are used in our reels.
- Hose and cable combined reels. One reel can manage/ transmit media including acousto-optic signals, various gas-liquid media, etc, at the same time.
